Objective

To obtain a full time job doing what I love: Designing and Developing websites, and to grow my skills while doing so.

Skills & Education

Core

- HTML/SASS
- JavaScript
- React
- Illustrator
- Photoshop
- XD & Figma

College

I am a Southern Crescent Technical College graduate with diplomas in **Programming** and **Website Design & Development**.

During my time at SCTech, I took **several online courses** on Udemy to supplement my learning. As such, **I had a years experience learning React** before taking the college course.

Additional Skills

• Animate   • Express   • Tailwind

Experience

Prohealth Nutrition
2013 – 2020

A small retail store that helped to develop my soft skills related to product knowledge and customer interactions.

Additionally, I helped them transition to a more modern POS system, maintained it, and set up a SQL database to help them track sales and discontinue dead stock.

Personal Projects
2019 infinity

I enjoy making things, so I have many small projects I've done over the years related to Web Development. And I plan to make many more. The most relevant ones I have been working on recently are:

Zenify – A Spotify Powered particle audio visualizer built in React
github.com/SilasCundiff/zenify

This project uses a particle library and the spotify api to visualize changes in the music real time.

The user can search for a song and watch as the particles react to the music.

Sakura Seeds – A React component library
https://silascundiff.github.io/sakura-blossoms/

An ever growing component library to support my future projects.

The linked site is a demo site displaying some of the components and allowing a user to update the theme of the website on the fly.

Visit my website for more information about these projects!
